# **ASHOT MANUKYAN**

PHP Full-Stack Engineer

## Profile

As a full-stack web engineer, I leverage my full-stack expertise to deliver high-quality, user-centric web applications while collaborating effectively within a team. Committed to continuous growth, I strive to enhance both technical skills and teamwork to drive impactful results in a dynamic development environment.

## **Employment History**

## Full-stack WEB Developer at Masys Tech, Yerevan

June 2021 — August 2023

- Skilled in crafting versatile web programs and websites tailored to meet diverse business requirements
- Work closely with other staff, such as project managers, graphic artists, UX designers, other developers, systems analysts and sales and marketing professionals
- Consult with clients and coworkers about the upkeep and performance of software systems in order to write or alter existing WEB applications

## Back-end developer at Elite Dev Squad, Yerevan

November 2023 — October 2024

- · Developed and maintained server-side applications using PHP and Laravel Framework
- Designed and optimized RESTful APIs and GraphQL for seamless data exchange
- · Collaborated with front-end developers to integrate user-facing elements with server-side logic
- Managed database systems including PostgreSQL, MySQL, and MongoDB
- Employed version control systems like Git and GitHub to streamline project workflows

## Full-stack engineer at Munich Ventures, Yerevan

January 2025 — September 2025

- · Developed and maintained scalable web applications using PHP, Laravel, and modern templating
- Enhanced front-end interactivity by integrating Vue.js and React.js components into Laravel views using Inertia.js
- Built reusable UI components (Vue/React) for dynamic features while leveraging backend capabilities
- · Designed and optimized RESTful APIs endpoints for SPA interactions and hybrid applications
- · Collaborated with cross-functional teams to deliver full-stack solutions
- Conducted code reviews and followed Git workflows for version control
